

Sushmitha Bungatavula

Seattle, WA | +1 (940) 597-2706 | sushmithabungatavula07@gmail.com | LinkedIn: [sushmithabungatavula](#) | Github: github.com/sushmithabungatavula | Portfolio: sushmithabungatavula.vercel.app

SUMMARY

Software Engineer with 3 years of experience building full-stack applications, backend services, and distributed systems. Proven track record delivering scalable APIs, real-time workflows, and cloud-based applications from development through production.

SKILLS

Programming Languages : Python, JavaScript, TypeScript, SQL, C++, Java, HTML, CSS
Databases : MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, Redis
Frameworks & APIs : FastAPI, React.js, Node.js, SQLAlchemy, REST APIs, WebSockets
AI and Data Science : PyTorch, TensorFlow, Scikit-learn, Transformers, Hugging Face, NumPy, Pandas
Generative AI : LangGraph, MCP, RAG, LangChain, LLM APIs, Prompt Engineering
Cloud & Infrastructure : AWS (S3, RDS, Lambda, Step Functions, Bedrock), GCP, Azure, Docker, Kubernetes
Tools & Practices : CI/CD (Jenkins, GitHub Actions), Azure Pipelines, Azure DevOps, Secure SDLC, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer - AI | Chicago Education Advocacy Cooperative, Seattle, USA (Remote)

July 2026 – Present

- Engineered a **full-stack client feedback platform** to streamline feedback collection and analysis for yoga, meditation, and Pilates instructors using Python, FastAPI, SQLAlchemy, React, and PostgreSQL, supporting **50+ pilot instructors and 150+ submissions**.
- Developed a **multi-agent analysis pipeline** with LangGraph and the Anthropic API to automate topic, sentiment, and safety-risk classification of open-ended feedback, reducing **manual analysis effort by 40%**.
- Implemented **hybrid RAG retrieval** using pgvector, full-text search, and reranking, and exposed AI workflows through a FastMCP server with GitHub Actions evaluation gates to automate **retrieval evaluation and regression testing**.

Software Engineering Intern - AI | Bharat-Harvest, Texas, USA (Remote)

May 2025 – Aug 2025

- Engineered multilingual crop advisory features in **11 languages** for **500+ farmers**, integrating backend APIs and user-facing workflows that increased **user engagement by 50%**.
- Implemented an **AI voice callbot** using Twilio Voice, OpenAI API, and Whisper, with intent classification and automated response generation, handling 100+ support calls/month and **reducing manual support requests by 30%**.
- Built **real-time chat** and media-sharing workflows using Socket.io, AWS S3, Node.js, Express.js, and MongoDB, **supporting 60+ farmer support cases per month**.

Software Developer | DXC Technology, India

Nov 2021 - July 2024

- Developed an employee background verification platform using React, Node.js, WebSockets, MySQL, MongoDB, and AWS Step Functions, supporting **10K+ concurrent users** with **<200 ms latency** and reducing verification processing time by **30%**.
- Built an **AI-powered HR chatbot** using Python, NLP, and LLM APIs, implementing document ingestion, text chunking, embedding - based retrieval, and context-aware response generation to automate employee queries, reducing HR support **requests by 40%**.
- Integrated **PayPal, PhonePe, and Google Pay** payment APIs with webhook validation, retry handling, and idempotent transaction processing, expanding subscription payment options and increasing completed transactions by **15%**.
- Performed SAST with Fortify and DAST with Burp Suite for enterprise clients including VFS Global and Vistara, identified **40+ OWASP Top 10** vulnerabilities and implemented fixes before release, **reducing critical vulnerability escape rate by 60%**.

PROJECTS

Chat With Your Docs: RAG App - [Link](#)

July 2026 – Aug 2026

- Developed an **end-to-end browser-based RAG application** for querying **PDF and text documents**, generating **citation-grounded answers** with clickable source passages.
- Built **hybrid document search** using embeddings and keyword matching, integrating **Claude Sonnet** with Vercel Edge Functions for streaming responses and source validation.

Ledgerly: ML-Powered Expense Tracker - [Link](#)

May 2026 – Sept 2026

- Developed an **end-to-end AI expense tracker** with automated transaction categorization and a confidence-based review workflow for ambiguous expenses.
- Utilized Python, Sentence Transformers, Claude Sonnet, and pgvector for semantic classification and retrieval, incorporating user corrections to improve categorization accuracy from **67% to 85%**.

Ride Matching Platform - [Link](#)

Jun 2026 – Sept 2026

- Implemented nearest-driver matching using **FastAPI, Redis, and PostgreSQL**, applying concurrency-safe driver assignment to prevent double-booking during concurrent ride requests.
- Deployed **event-driven trip workflows** with Kafka, Docker, and Kubernetes, enabling health monitoring and autoscaling from **3 to 20 replicas**.

DEGREE

University of North Texas, Denton, TX

Master of Science Computer Science, Specialization in Artificial Intelligence

May 2026

Bachelor of Technology in Electronics and Communication Engineering- Sridevi Women's Engineering College, India

CGPA - 3.87/4.0

LEADERSHIP AND CERTIFICATIONS

- Design and Publicity Head** for College Campus Radio, overseeing creative projects and promotions.
- AWS Certified Cloud Practitioner (**CLF-C02**), Microsoft Certified: Azure Fundamentals (**AZ-900**).
